# LEVI ROIZ

**Software Developer · Automation · Integrations**

Sobral, CE — Brazil · +55 88 99481-6389 · carlosleviroiz@gmail.com · linkedin.com/in/leviroiz · github.com/leviroiz

## SUMMARY

Software developer focused on automation, integrations and internal systems for e-commerce, ERP and logistics. I take work from process diagnosis to production, replacing rework and manual checks with tested, idempotent and traceable solutions. Experience with Python, JavaScript/TypeScript, React, REST APIs and ERPs such as TOTVS and Bling.

## EXPERIENCE

### Kallifon
Sobral, Brazil

**IT Assistant** — Sep 2026 – Present

- Built a commercial pricing calculator comparing progressive discount, loyalty and PIX payment scenarios, with isolated rules and automated tests; running in production on a VPS with Docker and Nginx.
- Implementing automated order-tracking notifications integrated with the TOTVS ERP API, with a persistent queue, deduplication and retries (in progress).
- Handling the J&T Express API integration in staging: authentication, request signing and payloads generated from electronic invoice (NF-e) data.
- Building the frontend of an internal recruiting platform (React, Next.js, TypeScript), in progress alongside the backend.

**IT & E-commerce Intern** — Jul 2026 – Sep 2026

- Built a Python and Selenium automation that audited 245 products and corrected 101 mispriced listings, with variant- and stock-level validation, safe resume and re-validation of every fix.
- Restructured the e-commerce category tree in the TOTVS ERP (about 172 references) and integrated it with the ViaShop platform via API.
- Automated the HR onboarding document workflow with Google Forms, Sheets, Apps Script and Drive.

### Brownieland
Remote · freelance

**Automation, Process & AI Contractor** — Jun 2026 – Sep 2026

- Set up an operations management hub in ClickUp with automations, commission tracking and dashboards.
- Built 3 AI assistants (custom GPTs) for management, marketing and legal/tax, with knowledge bases, autonomy limits and human review.

### JM Collection
Sobral, Brazil

**Administrative Assistant | E-commerce** — Mar 2025 – Oct 2025

- Launched the Nuvemshop online store (about 100 products, payments and shipping) and integrated Bling ERP with barcode picking.
- Coordinated teams of up to 5 people in inventory counts, reaching virtually zero stock discrepancies in the last stocktake.

### Brownieland
Remote

**Financial Analyst** — Feb 2024 – Feb 2025

- Managed cash flow and accounts payable and receivable; built Excel projections and periodic reports for the partners.

### Chromos Imagem
Sobral, Brazil

**IT Intern** — Aug 2023 – Dec 2023

- Handled hardware maintenance, user support, networking, cabling, image servers and backups.

## PUBLIC PROJECTS

**E-commerce price validation** — Python · Selenium · Pytest · CI · github.com/leviroiz/ecommerce-price-validation-selenium
**HR onboarding automation** — Google Apps Script · tests · github.com/leviroiz/rh-admission-automation-demo
**Commercial pricing calculator** — JavaScript · Playwright · github.com/leviroiz/calculadora-comercial-publica

## SKILLS

**Programming:** Python, JavaScript, TypeScript, SQL
**Web:** React, Next.js, FastAPI, HTML, CSS, Tailwind CSS
**Automation & testing:** Selenium, Playwright, Pytest, Google Apps Script
**Infra & integrations:** REST APIs, Docker, Nginx, Git, GitHub Actions, MySQL/MariaDB, SQLite, Postman
**Platforms:** TOTVS ERP, ViaShop, Bling ERP, Nuvemshop, ClickUp, Google Workspace
**Languages:** Portuguese (native) · English (intermediate, B1)

## EDUCATION

**B.Sc. in Software Engineering — UniCesumar** — expected 2030
**Technical Degree in IT — EEEP Monsenhor José Aloysio Pinto** — 2023
**Django Master — PycodeBR** — in progress
